

LAB OBSERVATION

EXPERIMENT-10

Implement transformation-based tagging using a set of transformation rules, apply a simple rule to tag words using python.

CODE:

```
1 word = input("Enter a word: ")
2
3 tag = "Noun"
4
5 if word.endswith("ing"):
6     tag = "Verb"
7
8 print("Final POS Tag:", tag)
```

OUTPUT:

```
... Enter a word: dancing
Final POS Tag: Verb
```
