

LAB OBSERVATION

EXPERIMENT-6

Implement a basic N-gram model for text generation. For example, generate text using a bigram model using python.

CODE:

```
1 text = input("Enter a sentence: ")
2
3 words = text.split()
4
5 print("Bigrams:")
6
7 for i in range(len(words)-1):
8     print((words[i], words[i+1]))
```

OUTPUT:

```
... Enter a sentence: I love learning NLP
Bigrams:
('I', 'love')
('love', 'learning')
('learning', 'NLP')
```
