

LAB OBSERVATION

EXPERIMENT-9

Implement a rule-based part-of-speech tagging system using regular expressions using python.

CODE:

```
1 import re
2
3 word = input("Enter a word: ")
4
5 if re.search("ing$", word):
6     print("POS Tag: Verb")
7 elif re.search("ly$", word):
8     print("POS Tag: Adverb")
9 else:
10    print("POS Tag: Noun")
```

OUTPUT:

```
... Enter a word: running
POS Tag: Verb
```
