

LAB OBSERVATION

EXPERIMENT-5

Use the Porter Stemmer algorithm to perform word stemming on a list of words using python libraries.

CODE:

```
1 from nltk.stem import PorterStemmer
2
3 ps = PorterStemmer()
4
5 words = input("Enter words: ").split()
6
7 print("Stemmed Words:")
8
9 for word in words:
10     print(ps.stem(word))
```

OUTPUT:

```
... Enter words: playing running studied
Stemmed Words:
play
run
studi
```
